QuizNest Examination Management System

Standard Examination Paper - Sample Format & Upload Template

FORMATTING GUIDELINES FOR AUTOMATIC QUESTION IMPORT:

When preparing a PDF or text document for automatic parsing into QuizNest, follow this standard pattern:

1. Each question must begin with a question number followed by a period or parenthesis (e.g., "1." or "1)").
2. Each choice option must be on its own line labeled A), B), C), D) or A., B., C., D.
3. The correct answer must be on a separate line starting with "Answer: X" (where X is the correct option letter).
4. An optional explanation can follow starting with "Explanation: ...".

SAMPLE QUESTIONS & ANSWERS:

1. What does SQL stand for in relational database management systems?

A) Structured Question Language
B) Structured Query Language
C) Simple Query Logic
D) Standard Query Loop

Answer: B — *Explanation: SQL stands for Structured Query Language, the standard ANSI/ISO language for relational databases.*

2. Which layer of the OSI model provides end-to-end reliable transmission and flow control?

A) Network Layer
B) Data Link Layer
C) Transport Layer
D) Session Layer

Answer: C — *Explanation: The Transport Layer (Layer 4) provides transparent transfer of data between end users and flow control.*

3. Which data structure follows the Last-In, First-Out (LIFO) operational principle?

A) Queue
B) Binary Search Tree
C) Stack
D) Linked List

Answer: C — *Explanation: A Stack operates under the Last-In First-Out rule where insertion and deletion happen at the top.*

4. What is the average-case time complexity of the Binary Search algorithm on a sorted array of size n?

A) O(n)
B) O(log n)
C) O(n log n)
D) O(1)

Answer: B — *Explanation: Binary search halves the search space at each iteration, resulting in logarithmic O(log n) time.*

5. Which of the following is NOT one of Coffman's four necessary conditions for deadlock in operating systems?

A) Mutual Exclusion
B) Hold and Wait
C) Preemption Allowed
D) Circular Wait

Answer: C — *Explanation: The necessary condition is No Preemption. If preemption is allowed, deadlocks cannot occur.*
